

ALLCAP

Fourth Quarter 2020

OBJECTIVE

The Disciplined Equity AllCap strategy seeks to outperform the Russell 3000 Index over time through superior stock selection while maintaining risk characteristics that are similar to the benchmark.

Benchmark: Russell 3000 Index

Inception Date: January 1, 1997

PHILOSOPHY

Our goal is to deliver a more consistent alpha for our clients. The challenge is, the stock market is a complex adaptive system and no static approach works all the time, therefore our analysis must emphasize the most important characteristics at any given point in time.

The Solution for Our Clients

- Employ a diverse set of factors
- Evaluate relative to multiple peer groups
- Adapt to evolving market conditions
- Construct a portfolio with an optimal balance of risk and return

Benefits

- Consistent excess returns from disciplined stock selection
- Style, sector and market cap diversification in one portfolio

PORTFOLIO GUIDELINES

Sector Over/Underweights: Russell 3000 +/-5.00%¹

Position weights: 0.50% to Russell 3000 weight +3.00%¹

Investment Universe: Russell 3000 Index Members

PROCESS

We use a “bottom up” systematic process to evaluate the universe of stocks using three independent analyses, each of which is designed to provide a unique valuation perspective.

Broad Universe Analysis (1 model)

- Evaluates each stock relative to all other stocks in the investment universe.

Style-Specific Analysis (8 models)

- Evaluates each stock relative to its peers with the same combined market capitalization and style profile.

Sector-Specific Analysis (11 models)

- Evaluates each stock relative to all other stocks in the same economic sector.

These three analyses are combined to generate an excess return expectation for each stock. Stocks must rank in the top 20% to be considered for purchase.

SELL DISCIPLINE

Successful positions are sold as return expectations are realized and/or valuation perspectives deteriorate into overvalued conditions.
