

SMIDCAP ESG

Second Quarter 2021

OBJECTIVE

The SMidCap ESG strategy seeks to efficiently capture return opportunities while managing portfolio risk relative to the Russell 2500 Index® and SMidCap model portfolio benchmarks.

Benchmark: Russell 2500 and SMidCap Model Portfolio

Inception Date: March 1, 2010

PHILOSOPHY

Our goal is to deliver a more consistent alpha for our clients. The challenge is, the stock market is a complex adaptive system and no static approach works all the time, therefore our analysis must emphasize the most important characteristics at any given point in time.

The Solution for Our Clients

- Employ a diverse set of factors
- Evaluate relative to multiple peer groups
- Adapt to evolving market conditions
- Construct a portfolio with an optimal balance of risk and return with an overall ESG rating that is at least 20% better than that of Russell 2500 Index

Benefits

- Consistent excess returns from disciplined stock selection
- Style, sector and market cap diversification in one portfolio

PROCESS

We use a “bottom up” systematic process to evaluate the universe of stocks using three independent analyses, each of which is designed to provide a unique valuation perspective.

COMPOSITE PERFORMANCE²

PORTFOLIO GUIDELINES

Holdings: Approximately 100-125 positions

Sector Over/Underweights: Russell 2500 +/- 5.00%¹

Position weights: 0.25% to Russell 2500 weight +1.50%¹

Cash position: Typically 0.5% to 1.5%

Average Annual turnover: Typically 60% to 120%

Investment Universe: Russell 2500 Members

PROCESS (cont.)

Broad Universe Analysis (1 model)

- Evaluates each stock relative to all other stocks in the investment universe.

Style-Specific Analysis (4 models)

- Evaluates each stock relative to its peers with the same combined market capitalization and style profile.

Sector-Specific Analysis (11 models)

- Evaluates each stock relative to all other stocks in the same economic sector.

These three analyses are combined to generate an excess return expectation for each stock. Stocks must rank in the top 20% to be considered for purchase.

The Portfolio construction process incorporates company level ESG scores seeking to build a portfolio whose overall ESG score is at least 20% better than that of the Russell 2500 Index. In addition, the portfolio does not invest in businesses that derive 5% or more of their revenue from the following activities:

- Manufacturers and owners of military weapons
- Manufacturers and owners of alcohol and tobacco products
- Manufacturers and owners of gambling devices and/or operators of casinos
- Companies with ties to Sudan
